PROFESSIONAL WORK EXPERIENCE

ASSISTANT PROFESSOR

Department of Architecture, School of Planning and Architecture, Vijayawada (SPAV), An Institution of National Importance, Ministry of Education, Government of India.

Website: <https://www.spav.ac.in>

(October 2009 till date)

Joining a National Institution in its nascent stage, opened up several opportunities for me beyond just academics. The most challenging task was handling the INR 150 crore estimated Campus Design coordination right from the inception of the School.

Key Position 1- Coordinator of the project and a Member of the Statutory Committee of the School i.e. Building and Works Committee in lieu of "Dean Planning & Development" and also Three times Special Invitee in the Board of Governors

Responsibilities- Successful organization of National level Two Stage Architectural Competition, Organizing statutory meetings, reviewing drawings, review of estimates, Finalising agreements, preparation of project schedules and timelines, taking up decisions, and all necessary co-ordination between CPWD, SPAV and the appointed Architect.

Achievements- Successful Campus project coordination of about 5,70,000 sq.ft. of Built up area

Key Position 2- In-charge of Institutional Consultancy

Responsibilities- Undertaking key Master planning and Architectural works including Preparation of New Consultancy Rules for the Institute

Achievements- Accomplished all the Consultancy projects undertaken within the stipulated deadlines

Key Teaching and Research responsibilities – Taught subjects like Architectural Design, Art Appreciation, Theory of Design, Architectural seminar, Urban Design etc.

Achievements- Published several technical papers, organised workshops and Seminars. Received International Scholarship, International funded projects and delivered presentations on International platforms (in 8 countries). Also, successfully completed Doctoral studies in Architecture.

This period has been enriching for me in developing **deep theoretical knowledge, presentation skills (both oral and visual) and expertise in handling any task**. Recently, I was awarded Doctorate in January 2021 by the Department of Architecture, School of Planning and Architecture Vijayawada for my research on the topic "Floor Space Index and Liveability of Residential Neighborhoods- Establishing linkages for retrofitting".

Handled major projects for INFOSYS campus, Mysore

In the beginning of my architectural career, I learnt *in* delivering high quality projects for a Client like INFOSYS (the Software Giant) with the most stringent deadlines. The organisation expected a relentless completion of their upcoming Multiplex for Infosys Employees which had a huge 38 m geodesic dome as an external skin within 9 months. My role was significant in conceptualization and design development in coordination with Geodesic techniques pvt ltd. for the external dome structure, Study on theatre design and requirements, design discussions with INFOSYS team, design detailing and preparation of working drawings as per the inputs from Theatre consultants, frequent Site visits and site meetings with structural, Landscape, Acoustical, Electrical, Air conditioning, Interior and project management consultants.

Key Project 1 -INFOSYS MULTIPLEX at Infosys Mysore Campus. (5.5 lakh Sq.ft.) Project Estimate = 40 crores

Key Project 2 -INFOSYS Software Development Block at Mysore -Schematic Design proposal for software block

Key Project 3 -INFOSYS Auditorium complex at Bangalore -Concept Design entry for a closed competition

JUNIOR ARCHITECT

RDS Architects, Hyderabad.

(From July 2003 to May 2004)

Worked on three projects out of which two were entries for a closed competition where the design concept and scheme were presented. Design concept was emphasized on energy efficiency.

Key project 1 - School of social sciences for Hyderabad Central University, Project Estimate = 2.5 crores

Key project 2 - Lecture Hall complex for Hyderabad Central University, Project Estimate = 2.2 crores

Key Project 3 - CMSD building for Hyderabad Central University, Project Estimate = 6 crores

EDUCATION AND QUALIFICATIONS

PhD. in Architecture (2021)

PhD Thesis Title: "Floor Space Index and Liveability of Residential Neighborhoods- Establishing linkages for retrofitting".

From Department of Architecture, School of Planning and Architecture, Vijayawada, India

(An Institution of National Importance, Ministry of Education, Government of India)

The research focusses both on Architectural and Urban design issues of managing Floor Space Index (or Floor Area Ratio) and how it affects the liveability of cities. The research explores the understanding of key parameters of Liveability through an empirical study conducted in case areas and attempts to bring in inter linkages between physical and perceptual parameters associated with local built form, which is a derivative of Floor Area Ratio or Floor Space Index. The research findings also indicates that higher measures of Liveability can be achieved and validated with relaxation of Floor Space Index upto a value of 3 in the present low-rise neighborhoods. Various dimensions of the research evaluation contribute to both theoretical body of knowledge and for real time development interventions in the practice.

During my research tenure, I was awarded the 'Erasmus Plus Global Mobility scholarship' to undertake part of my research at Norwegian University of Science and Technology, Trondheim, Norway in 2016.
