Overview of BIS

BIS is the National Standard Body of India established under the BIS Act 2016 for the harmonious development of the activities of standardization, marking and quality certification of goods and for matters connected therewith or incidental thereto. BIS has been providing traceability and tangibility benefits to the national economy in a number of ways – providing safe reliable quality goods; minimizing health hazards to consumers; promoting exports and imports substitute; control over proliferation of varieties etc. through standardization, certification and testing.

STANDARD MARK

The BIS Standard Mark stands as India's definitive symbol of quality, safety, and reliability, administered by the BIS. As a vital instrument for consumer protection and regulatory compliance, it offers a trusted assurance that products strictly conform to established Indian Standards. This mark covers a wide range of products—including helmets, toys, pressure cookers, and more than 700 other items—ensuring confidence and safeguarding the interests of consumers nationwide.

CRS MARK

The BIS CRS Mark (Compulsory Registration Scheme mark) is a specialized certification mark issued under Scheme-II of the BIS. Introduced in 2012 in collaboration with the Ministry of Electronics and Information Technology (MeitY), the CRS embodies a modern, streamlined approach to conformity assessment. It safeguards Indian consumers against substandard and hazardous electronic products while keeping pace with the rapid lifecycle of high-tech devices such as laptops, mobile phones, CCTV cameras, and other electronic equipment.

Governed by the BIS under the BIS Act 2016, BIS Hallmarking is India's official purity certification system for precious metals—specifically for gold and silver. It protects consumers from adulteration and guarantees that the fineness of the precious metal aligns exactly with the purity claimed by the jeweller.
